

NEW-YORK DAILY TRIBUNE, WEDNESDAY, OCTOBER 12, 1864.

Death of Joshua Bates.

The death of Mr. Joshua Bates, the eminent London banker of the house of Baring Brothers and Company, took place in London on the 26th of September, in the seventy-sixth year of his age. Mr. Bates was born in Weymouth, Mass., in 1788, and was descended from a family of emigrants from England, which occupies a conspicuous place in the early history of Massachusetts. After receiving the usual education of a New-England country village, he entered a counting-house in Boston, where he gained his first knowledge of mercantile affairs, and was soon distinguished for his capacity and aptitude for business. Passing into the employment of the celebrated William Gray, the leading merchant of Massachusetts, he was placed in charge of highly responsible trusts even before the attainment of his majority, and during the troubles with England prior to the war of 1812, was dispatched to Europe with a view to protecting the interests of his employer, many of whose vessels had been captured both by Great Britain and France. In this new field of effort, he was brought into intimate relations with the great commercial and banking houses of Europe, especially those of the Hopes and Barings, and soon acquired a reputation for ability, integrity, and sound judgment which gave him not a little influence in the highest commercial circles. In 1820, he established a mercantile house in London in connection with Mr. John Baring, under the firm of Bates & Baring, and was subsequently made a partner in the distinguished firm of Baring Brothers and Company, of which he continued an active and efficient member until the time of his death. In 1842, when a commission was arranged to settle claims of citizens of the United States on the British government, and of subjects of Great Britain against the United States, chiefly for violations committed during the war, Mr. Bates was appointed umpire between the British and American commissioners, in all cases where they should disagree. He performed the duties of this honorable and delicate office with a promptness, impartiality, and fidelity which gave entire satisfaction to both parties. In 1852, he was informed of the plan of establishing a free public library in the city of Boston, and at once appropriated the sum of \$50,000 for the accomplishment of the object, besides a donation of between 20,000 and 30,000 volumes of books, after the completion of the building. Mr. Bates preserved to the last his interest in his native country, and watched the eventful struggle with the Rebels of the South with the deepest solicitude and with all his sympathies on the side of the Union.

Obituary.—Judge Willard, of Troy, died on Sunday evening of a painful disease, after months of acute suffering. He had served as Judge of the Court of Appeals and as State Senator. Although a Democrat, he was an able and respected citizen, and a most estimable gentleman.

Winter Garden.—A bright little farce by J. P. Wooley, entitled "Love in Liver," was performed for the first time at this theater on Monday evening. It was originally produced some twenty years ago in Liverpool, and has since been a favorite with English audiences. The plot and situations of the piece are extremely diverting, although perhaps not specially original, suggesting scenes incident in "The Honeymoon" and in "Leap Year." In the character of Paul Priest, Mr. Clarke will be unusually happy, especially for the display of his best comic qualities, and his performance on Monday night was received with greater applause and much more enthusiasm than is common. The scene of the interview between the disguised valent and the coquettish was so ingeniously well drawn as to quite discompose those concerned in the representation. Mrs. Chapman acted the part of the coquette, and was highly successful. The play will be repeated for a few nights together with "The Comedy of Errors."

Dr. Wm. H. Gregg.—Dear Sir: In February, 1861, I was afflicted with sugar diabetes, and for five months I passed more than two gallons of water in twenty-four hours. I was obliged to give up as often as ten or twelve times during the night, and in five months I lost about fifty pounds in weight. During the month of July, 1861, I procured two bottles of Constitution Water, and after taking two bottles I was entirely cured, soon after regaining my normal good health.

Yours truly, J. V. L. DODGE,
